

Spectacular MUSEUM-QUALITY "JUDAEA CAPTA" SESTERTIUS

Order No. S-1

After the Romans defeated the Jews and destroyed their Holy Temple in 70 A.D., they issued an extensive series of coins in many denominations to proclaim their hard-fought victory. The "king" of this "Judaea Capta" series is the large bronze Sestertius.

The example that we are privileged to offer our members features the Emperor Vespasian's portrait. He originally came to prominence as head of the Roman army against the Jewish uprising. His son, Titus, took over as general once Vespasian became Emperor. On the reverse of this magnificent coin, two Jewish captives are shown — a male standing to the left of a palm tree, his hands tied behind his back, and a female seated in mourning to the right. "IVDAEA CAPTA" (Judaea Captured) is inscribed above, and "S.C." (by consent of the Senate) is below.

The coin is sharply struck and perfectly centered. With a magnifying glass, you can see the dejected faces of the two Jewish prisoners! Even the beautiful green and rose patina add to the attractiveness of this virtually perfect 1900-year-old coin. In fact, the coin can be precisely dated, since the obverse inscription indicates that it was issued during the third consulship of Vespasian, which corresponds to 71 A.D.

This superb coin was formerly a star of Bank Leu's Sale No. 30, where the conservative Swiss company described it as "Superb Extremely Fine." This specimen will undoubtedly be the highlight of any collection. Of course, we will supply a PNG certificate of Authenticity. This coin-type has been catalogued as Wacks 82 or Cohen 232 Var. Superb Extremely Fine. \$7500.00
